7060

Flashlight

Producing up to 700 lumens of output and 68 hours of runtime, the 7060 USB-C Tactical Flashlight combines professional-grade endurance with USB-C charging, real-time battery status indication, and dual-switch activation for critical operations and extended shifts. When changing environments demand flexibility, the dual front and rear switches provide immediate access from either a body-mounted or tail-mounted position, giving users total control over momentary illumination. Fully programmable light modes allow users to customize operation to their individual preferences and requirements. Available in both USB-C and with a docking configuration, the 7060 adapts to patrol vehicles, workstations, and field deployment environments with ease – making it a dependable tool for duty carry, emergency response, and mission-critical work.

- USB-C rechargeable Lithium-Ion Battery
- Up to 68 hours of run time
- Dual switch technology with front and rear activation buttons
- Molded no-slip grip
- Selectable light modes in High, Medium, Low, and Strobe
- Los Angeles Police Department standard issue light
- Lifetime Guarantee of Excellence

SPECS

SIZES

Length	9.48" (24.1 cm)
